

EXECUTIVE SUMMARY

iBizAI at a glance

iBizAI is the business-AI initiative of CEMI: an independent, vendor-neutral guide to what AI does for a company, and a curated suite of tools that CEMI builds and operates on the client's own knowledge.

COMPANY	iBizAI — Intelligent Business with AI. A CEMI initiative, published at ibizai.io in English, Spanish and French.
PROBLEM	Companies outside the largest markets are sold AI as a demo. What they need is a small set of tools that survive contact with real operations, in their own language, at a price their budget recognises.
SOLUTION	A curated AI Suite across three tiers — everyday helpers, active assistants, strategic intelligence — plus custom assistants built on the client's own documents, with citations and anti-hallucination guardrails.
STATUS	Published and operating: 80+ working business tools, 250+ content units across 15+ sectors, four AI-readiness assessments, three languages, a published price list across two regional tiers, and a delivered client assistant for the Franco-Dominican Chamber of Commerce.
BUSINESS MODEL	Subscriptions (Individual, Team, Enterprise, Group / Holding), custom assistant builds, consulting, and training. Full detail and every published price: /investors/revenue/
DIFFERENTIATION	The guide and the builder are separate on purpose: iBizAI recommends, CEMI builds and operates. Two regional price tiers instead of one first-world price. Trilingual by construction, not by translation afterwards.
TEAM	Carlos Miranda Levy, Coordinator of CEMI's Enhanced Intelligences, with an AI executive team disclosed as AI personas. /investors/team/
WHY NOW	The tools are built and published; the missing piece is the commercial machinery — self-serve subscription, a Group console, and a packaged version of the assistant build we have already delivered once.
